Steel tanks

Fuel Tanks

Tanks for transporting fuel, with capacity and configuration options tailored to the vehicle and its operation.

Company product documentation - Fuel Tanks

Documented options

5,000 L - Full side guards

5,000 L - Cab canopy

5,000 L - Fuel dispenser

5,000 L - Fuel tank configuration

5,000 L - Red and white finish

10,000 L - Side guard model

10,000 L - Fuel tank configuration

15,000 L

16,000 L - Round mudguard model

16,000 L - Two compartments

30,000 L

Discuss with our team

Fuel type, capacity, chassis, compartment layout and fuel dispenser requirements.

Steel tanks

Water Tanks

Tanks for water transport and spraying applications. Capacity and equipment are discussed to suit the intended use.

Company product documentation - Water Tanks

Documented options

5,000 L - Spraying configuration

8,000 L

15,000 L

20,000 L - Hose swing

30,000 L

Discuss with our team

Application, capacity, chassis, spraying arrangement and hose equipment.

Steel tanks

CPO Tanks

Vehicle-mounted tanks for transporting crude palm oil (CPO), with dimensions and configuration discussed around operational requirements.

Company product documentation - CPO Tanks

Documented options

CPO tank

Capacity and dimensions are confirmed for each unit.

Discuss with our team

Capacity, chassis, dimensions and filling or discharge requirements.

Storage tanks

Steel Storage Tanks

Storage tanks in cylindrical, rectangular, secondary-tank and semi-square configurations. Capacity depends on the model and agreed specification.

Company product documentation - Steel Storage Tanks

Documented options

Cylindrical - 500-50,000 L

Rectangular - 300-40,000 L

Rectangular + secondary tank

Semi-square - 5,000 L

Semi-square - 10,000 L

Discuss with our team

Stored liquid, capacity, installation space, supports, and filling and discharge connections.

Stainless steel tanks

Stainless Steel Tanks

SS tank options from the company documentation. Capacity, material grade and thickness are confirmed in the specification for each unit.

Company product documentation - Stainless Steel Tanks

Documented options

4,000 L

6,000 L

7,000 L

8,000 L

Discuss with our team

Application, liquid type, capacity, material grade, thickness and vehicle configuration.

Tanker trailers

Tanker Trailers

Trailer-mounted tanks for transport and operational use. Capacity and configuration are developed through discussion of the required application.

Company product documentation - Tanker Trailers

Documented options

Tanker trailer

Capacity and dimensions are confirmed for each unit.

Discuss with our team

Liquid type, capacity, towing unit, dimensions, and tank and trailer configuration.

Vehicle bodywork

Fuso Steel Truck Bodies

Steel truck bodies for Fuso commercial vehicles, with dimensions and configuration discussed to suit the chassis and load.

Company product documentation - Fuso Steel Truck Bodies

Documented options

Steel body - Workshop inspection

Steel body - Yellow-cab unit

Steel body - White-cab unit

Other documented configurations

Discuss with our team

Vehicle model, chassis dimensions, load type, body dimensions and loading access.

Vehicle bodywork

Steel Box Bodies

Steel box bodies documented on Fuso, pickup and PS vehicles, including several interior lining options.

Company product documentation - Steel Box Bodies

Documented options

Fuso steel box body

Pickup steel box body

PS box body - Unlined interior

PS box body - PVC interior lining

PS box body - Full plywood interior lining

Discuss with our team

Vehicle, load type, box dimensions, door access and interior lining.

Containers / bins

Waste Containers / Bins

Waste containers in open and enclosed configurations. Dimensions and configuration are discussed to suit the intended load-handling requirements.

Company product documentation - Waste Containers / Bins

Documented options

Enclosed bin

Open bin

Discuss with our team

Load type, volume, dimensions, open or enclosed design, and handling system.

Trailers

Tipping Trailers

Trailers with a hydraulic tipping body, configured through discussion of the customer's transport and operational requirements.

Company product documentation - Tipping Trailers

Documented options

Hydraulic trailer

Capacity and dimensions are confirmed for each unit.

Discuss with our team

Load type, carrying requirements, towing unit, body dimensions and tipping mechanism.

Trailers

Non-tipping Trailers

Non-tipping trailers documented in an animal-feed transport configuration. Dimensions and configuration are tailored to the transport requirements.

Company product documentation - Non-tipping Trailers

Documented options

Animal-feed trailer

Capacity and dimensions are confirmed for each unit.

Discuss with our team

Load type, carrying requirements, towing unit, dimensions and loading access.

Selected projects

Tank and pipework projects from our company profile.

PLN

20 kL storage tanks

Six tanks, each with a 20 kL capacity, for a generator programme in remote areas of Kotabaru.

PT Antang Gunung Meratus

Interconnecting tank pipework

Pipework connecting storage tanks to a fuel dispenser for refuelling heavy equipment.

Adaro

5 kL diesel tank

Equipped with a fuel dispenser for refuelling heavy equipment and dump trucks at a mine site.

PT Artafindo Perkasa

10 kL diesel tanker

Truck-mounted tank for a fuel transport company in Samarinda, East Kalimantan.

From fabrication to after-sales support.

Discuss the unit, application and scope with our Banjarbaru team.

Company work documentation

Components fitted to a tank unit

Fabrication

Vehicle-mounted and storage tanks, with capacity and configuration discussed to suit your needs.

Bodywork sales

Tanks, truck bodies, box bodies, trailers and waste containers. Discuss the vehicle and its load with our team.

Spare parts

Tank accessories, spare parts, flow meters and modules. Confirm component compatibility before ordering.

Repairs & servicing

Bodywork repairs and servicing for tanks, truck bodies and box bodies. Scope is discussed after inspecting the unit.

Repair scope and component availability are confirmed during consultation.
